DETAILED ACTION

1. This office action is in response to the Amendment filed October 12, 2006.

Accordingly, claims 1, 4, 14 and 17 were amended, and claims 27-52 were cancelled. Currently, claims 1-26 are pending in this application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the title: change the title as "Liquid crystal display device comprising a plurality of spacers having compression ratios gradually increasing as advancing from a center to left and right edges of display region."

Allowable Subject Matter

3. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly suggests or shows all of the limitations as claimed. Specifically,

Re claims 1 and 14, none of the prior art of record discloses, in combination with other limitations as claimed, a liquid crystal display device comprising a plurality of spacers formed in the display region, wherein compression ratios of the spacers gradually increase as advancing from a center to left and right edges of the display

Art Unit: 2871

region, wherein the compression ratio of each spacer is a height reduction of the spacer by compression divided by an original height of the spacer.

The most relevant reference, US 6,184,967 B1 to Lagerwall et al. (Lagerwall), fails to disclose or suggest the claimed invention. As shown in Figs. 2, 3A and 4, Lagerwall discloses a liquid crystal display device comprising a plurality of spacers 11 formed in the display region, wherein compression ratios of the spacers are formulated in order to obtain a pressure-insensitive display, wherein the compression ratio of each spacer is a height reduction of the spacer "Delta h" by compression divided by an original height h of the spacer (col. 4, lines 38-67). However, Lagerwall does not suggest that the compression ratios of the spacers gradually increase as advancing from a center to left and right edges of the display region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thoi V. Duong whose telephone number is (571) 272-2292. The examiner can normally be reached on Monday-Friday from 8:30 am to 4:30 pm.
